A Word To The Parents

With the tremendous growth in technology, the world has shrunk into a global village – the multitudes of gadgets (cell phones, iPad, tablets etc.), in the market has become a trap for children especially the adolescent and teens. Children spend a lot of time on mobile phones, internet surfing and social network sites.

I consider this as a favorable platform to voice my concern on the issues of addiction to the various gadgets. I urge the parents to spend more time with their children to keep a watch on them. Please Inculcate good values. Give them the freedom to express their fears. We need to train our children to take charge and be responsible for their success and failure. We request our parents to cooperate with us to achieve a common goal of holistic education. We earnestly look forward to your constant support and cooperation.

Advice to Students

Dear students make the best use of time at hand. You are the architect of your own destiny. There are many distractions around you. Focus on your goal, cultivate good habits and values. They are stepping stones for your beautiful tomorrows.

Conclusion:

All the achievements of our school has been possible with the cooperation of our highly qualified and dedicated faculty. It is rightly said “The secret of all great undertakings is hard work and self-reliance.” I avail this opportunity to express a heartfelt thanks to our Chairman Dr. Ahmed Al Mutib for his trust in our hard work and self reliance, which has boosted our efforts to make our school one of the best schools in Riyadh. And I also thank our Director, Ms Farah Al Mutib for her constant support and cooperation in all matters concerning school management. I would like to conclude by extending our sincere thanks to all the parents and each one of you our well wishers who have lent a supportive hand down through the years, in all our endeavors to produce a confident, educated and capable batch of students each year. Thus, shaping the future of your children who are the destiny of this country.

“The central task of education is to implant a will and facility for learning; it should produce not learned but learning people. The true human society is a learning society where grandparents, parents and children are students together.”

Thank You

Mrs. Tabassum Farooqi
